Mr. Casey Dillon  
Atlas Excavating, Inc.  
4740 Swisher Road  
West Lafayette, Indiana 47906

Subject: City of West Lafayette, Indiana  
Division I – Western Sanitary Sewer Interceptor

Dear Mr. Dillon:

This letter is to commend Atlas Excavating, Inc. for your excellent work in completing Division I of the Western Sanitary Sewer Interceptor project for the City of West Lafayette, Indiana. Greeley and Hansen served as the City's representative for the construction of this project.

The \$2.6 million project involved the installation of approximately 2 miles of 24-inch and 27-inch diameter gravity sewer. Excavations ranged from 15 to 35 feet in depth. High groundwater tables were the norm for the project which required dewatering. We would like to highlight the team's successful installation of approximately 3,000 feet of pipe within the Purdue University Kampen Golf Course and adjacent Turfgrass Research Center. Atlas' crews worked diligently to complete the work in this sensitive area under a compressed schedule and while being confined to a narrow construction easement.

We would like to recognize the efforts of Atlas' project manager, Paige Cox, and Atlas' field superintendent, Erin Hatten. These two individuals were always professional and maintained effective communication throughout construction to deliver a successful project that was completed on time and within budget.

Sincerely,

Joseph Teusch, P.E.

Project Manager
